Summary

I am a Freelance Full Stack Developer with 4+ years of experience, specializing in web, mobile application development. With a strong track record of delivering excellence, I've successfully completed projects for clients of all sizes.

Highlights:

- **Proven Freelancer:** I've completed numerous projects as a freelancer, earning over \$50,000 on Upwork.
- **Upwork Success:** My Upwork profile boasts a 100% job success rate, and I hold the prestigious Top Rated Plus status.
- **Tech Proficiency:** I excel in a wide range of technologies and frameworks.
- **Adaptable:** I quickly adapt to emerging technologies and trends.

Experience

Full Stack Developer

Impakt Inc. • California, US

04/2022 - Present

- Centralized services were developed for the products: NestJS, Open API, SQL usage, security middleware, writing unit, e2e tests with Jest, and data management with REST.
- A Discord bot was developed: transferring requests opened from Discord to Freshdesk, using Discord.js, Redis, and Freshdesk API, using AWS Lambda and API Gateway. To help the customer support team, 5000 tickets were successfully transferred.
- Ensuring uninterrupted login across products: cookie sharing was provided for subdomains.
- A domain routing middleware application was developed: using Next.js middleware and Vercel Edge Functions, to make linking across the start-up's products more readable and memorable through custom domains, for marketing opportunities.
- A social platform application for the web was developed: using Typescript and React, allowing users to create customizable groups, view in-game leaderboards and upcoming events, and integrate with other products (through deep linking and bridge connections).
- A single-page application listing products for the marketing department was developed: using SolidJS, and connected to a CMS using the Sanity service.
- A web application containing information and privacy policies: using Next.js, published through Vercel, with the advantage of SSR for SEO.

React Native Developer (Part-Time)

Meet The Music • Izmir, TR

07/2023 - 09/2023

- Integrated Google Analytics to track user behavior, events, and user journeys.
- Implemented data collection mechanisms for user and app usage data.
- Utilized Maestro E2E testing for core product reliability.

Mid-Level Full Stack Developer

Ego Lounge • West Bloomfield, US

01/2022 - 04/2022

- Providing access to user data for gaming platforms: OAuth2 and Auth0 integrations were provided with Passport.js.
- Saving data to the database: Firebase Authentication and Cloud Firestore integrations were provided.
- Frontend development: Next.js and styled-component libraries were used.

Junior Mobile Developer

Curbfood.se • Stockholm, SE

12/2020 - 03/2021

- User profile page: implemented with React Native, styled-components, and the Firebase Authentication service,

including login and registration processes.

Junior Frontend Developer

Normative.io · Stockholm, SE

09/2020 – 11/2020

- Landing page: developed using the React.js and styled-components libraries.
-
